Kelley and Eduardo,

I have attached the GoogleEarth.kmz file and a few screen shots to show you'll all of the sample locations. I have inserted my proposed GW/SW/SED locations.

Thank you.

Connor-

Thanks for the quick response and details.

I will let DNREC know that you have been given approval to move ahead with the SI and will be coordinating with them as you move forward.

FYI - it looks like we will be sampling some additional private wells over the next two weeks. These are located within the current sampling area. We will share results.

Kelley,

Good morning. I spoke with Linda Gaines in HQ on Monday. Per normal procedure, I filled out the online consultation form and sent some supplemental data to aid the request. She indicated

that the site is eligible for an expedited review. She approved it later that day, and I am permitted to proceed to the SI assessment.

I am in the process of finalizing the site inspection. I am attempting to collect all of the data and maps I can find. I am plugging everything into Google Earth at the moment to figure out where to install wells, and collect SW/SED samples. I also reviewed the fish study DNREC spoke about during a previous meeting, however it appears they did not sample for PFAS. I have a meeting with Yazmine today to discuss the budget for the SI and to figure out the next steps. I am hoping to finalize the paperwork next week. I have also placed a request for technical support, Nate Doyle was assigned to the site. I hope to meet with him in the next two weeks.

Thank you.

Subject: Procino assessment?

Hi Connor-

Meant to call or stop by your cube earlier - but forgot. Eduardo and I had a call with DNREC earlier today to discuss residential well sampling. During the call DNREC asked about the status of planned assessment at Procino. We indicated that we thought a consult with HQs was pending, but said we'd follow up with you and ask you to provide an update to DNREC.

Thanks- Kelley
